

**SCHOOL WASH PROJECTS**

IYO runs effective water, sanitation and hygiene (WASH) projects with rural schools in Dodoma, promoting hand washing, menstrual hygiene, water safety and good sanitation practices

IYO Public campaign program about clean and safe drinking water for school children to promote positive hygiene behavior. Improving hygienic behavior in schools is essential for keeping children in school, and ensuring their right to education. Project conducted in Mkuranga coast region.

Singida region in Tanzania poor sanitation, water scarcity, inferior water quality and inappropriate hygiene behavior are disastrous for young school children. This project aims at increasing the level of knowledge towards healthy hygiene and sanitation practices for clean and safe drinking water to 5000 primary school children in rural Kiomboi district. The project will reduce waterborne disease by 60 % among school children and increase school attendance, performance and ensure child's right to education
